OVERVIEW

How does Inflation correlate with Life Satisfaction?

Created a cross-country dataset, collecting, cleaning, and organizing 100+ datasets for analysis. Ran stepwise multiple regression and correlations using JASP.

Inflation has a small but significant negative effect. ($r=-0.196$, $p<.05$)
GDP per capita and tertiary education rates are strong positive predictors of life satisfaction.

What influences Life Satisfaction Score to ?

MODEL RESULTS

Stepwise regression performance and inflation-satisfaction relationship.

Inflation shows a small but statistically significant negative relationship with life satisfaction ($B = -0.147$, $p = .013$), even after controlling for GDP per capita, education, and unemployment.
